

PART I. SUBJECT INDEX

- Aeration** of hatchery water supplies and incidence of disease, Moore, E., 195-196.
- Algae** as food of fishes, Tilden, J. E., 178-187.
food of lake fishes, Nurnberger, P. K., 174-177.
relative abundance of in centrifuge plankton, tabulation of, 97.
- Angler** and fish-culturist, relation between, Lockwood, K. F., 246-249.
- Aquatic** biology and physics, report of vice-president division of, Davis, H. S., 22-23.
- Bass**, black, protection of, 29, 36.
large-mouth, trap for the capture of, Heslen, H. O., 118-124.
ponds, stocking of (disc.), 89-93.
- Biological** and limnological studies of the Great Lakes, Van Oosten, John, 69-71.
Survey, contributions of to study of fish diseases, McCay, C. M., 197.
- Blotch disease** in channel catfish, treatment of, 117.
- Brook trout** (*Salvelinus fontinalis*): see Trout, brook.
- Brush** to assist natural propagation in inland lakes, Webster, B. O., 204-205.
- Bureau of Fisheries**: see **United States Bureau of Fisheries**.
- Buttermilk** as food for fish (disc.), 163.
- Caledonia** hatchery waters, chemical analysis of, 196.
- Canada**, treaty with for protection of sockeye salmon and the Great Lakes fisheries, 32-33.
- Catfish**, channel, experiments in rearing, Clapp, A., 114-116.
channel, hatching of (disc.), 116-117.
- Cellulose** as refuse for carnivorous species (disc.), 145.
- Champaign County**, Illinois, survey of fishes of, Thompson, D. H., 250-255.
- Chataqua** hatchery water supply, chemical analysis of, 196.
- Chilodon**, as parasite of minnows, control of, Bangham, R. V., 199.
- Chironomid** larvae as fish food, Johnson, M. S., 153-157.
- Chub** nets in the Great Lakes, Van Oosten, J., 65-67.
regulations, 69.
- Cocoonut**, relative value of as food for brook trout, Titcomb, J. W., and others, 133-135.

Committee reports (of more than passing interest):

Foreign relations, 31-33.

International relations, 37-39.

relations with national and state governments, 33-34.
resolutions, 35-36.**Cottonseed meal**, relative value of as food for brook trout, Titcomb, J. W.,
and others, 133-135.**Creel census** in Michigan (disc.), Westerman, F. A., 236.**Crustacea**, number of per litre of pond-water, tabulation of, 98.**Cyclochaeta** as parasite of minnows, control of, Bangham, R. V., 199.**Deaths** of members of American Fisheries Society "In Memoriam,"
list, 41.**Diseases** of fish, Biological Survey study of, McCay, C. M., 197.**Eggs** of trout, fertilization of (disc.), 60-61.
sizes of (disc.), 59-60.**Fairport Biological Station**, investigations in pond-fish culture, Davis,
H. S., 86-89.**Fertilization** of fish ponds (disc.), 101-105.**Fertilizers**, effects of, on plankton production, Wiebe, A. H., and others,
94-101.**Fish parasites**: see **Parasites**.

percentage of different kinds of consumed by trout, tabulated, 150.

Fish-culture in Louisiana, Viosca, P., 207-213.

in Southern States (disc.), Leach, G. C., 215; Tucker, W., 215-216.

report of vice-president division of, Laird, J. A., 21-22.

Fish-culturist and angler, relation between, Lockwood, K. F., 246-249.**Fish-ponds**, utilization of sloughs in the Upper Mississippi Wild Life
and Fish Refuge for, Surber, E. W., 105-110.**Fisheries problems** on the Great Lakes, Van Oosten, J., 63-79.United States Bureau of, work of in Lake Superior region, Cook,
W. A., 56-59.**Fishing**: see **Chub nets**; **Hook fishing**.**Food for fish** (see also **Algae**; **Buttermilk**; **Chironomid larvae**; **Cocoonut**;**Cottonseed meal**; **Horse flesh**; **Liver**; **Salmon eggs**; **Sea fish**; **Shrimp**
meal), Einarsen, A. S., and Royal, L., 268-271; (disc.), 171-172.

cellulose, as refuges for carnivorous species (disc.), 145.

comparative values of (disc.), 143-144.

Food, natural, of lake fish, Nurnberger, P. K., 174-177.

succession of in a lake, Birge, E. A., 188-194.

Foreign relations, report of committee on, 31-38.

- Governments**, national and state, report of committee on relations with, Clemens, W. A., 33-34.
- Great Lakes fisheries**, pending treaty for international control of, 32-33.
problems of, Van Oosten, J., 63-71.
status of, Radcliffe, L., 45-51.
resolutions concerning, 35-36.
- Growth factors** in relation to space (disc.), 144.
- Growth of trout** in proportion to the amount of food consumed, Davis, H. S., and R. F. Lord, 160-163.
- Growth rates**, normal and stunting of, in brook trout, Titcomb, J. W., and others, 126-143.
- Hatchery water supplies**, aeration of and incidence of disease, Moore, E., 195-196.
- Herring meal** as food for fish, Einarsen, F. S., and Royal, L., 268-271.
- Herring regulations** in Michigan, Van Oosten, J., 67-69.
- Hook fishing**, on the Great Lakes, Van Oosten, J., 63-65.
- Horse flesh** as trout food, Thompson, W. T., 168-171.
- Hydrogen sulfid test** of respiratory activity, Belding, D. L., 241-243.
- Illinois** (Champaign County) survey of fishes of, Thompson, D. H., 250-255.
- Infusoria** as parasites of bait minnows, Bangham, R. V., 198-201.
- Lake Erie**, pollution in, 51.
- Lake Mendota**, food for fish in, Birge, E. A., 188-194.
- Lake Pepin**, *Chironomus plumosus* in, Johnson, M. S., 153-157.
- Lake Superior** region, summary of work of U. S. bureau of fisheries in, Cook, W. A., 56-59.
- Lake trout** taken in chub nets, lake Huron and Michigan, tabulation of, 75.
- Lakes and streams**, pollution of: see **Pollution**.
- Lakes**, propagation in, assisted by staking brush, Webster, B. O., 204-205.
- Legislation**, protective, on fish and game in various states, 26-28.
- Librarian's report**, Titcomb, J. W., 19-20.
- Limnological and biological studies** of the Great Lakes, Van Oosten, J., 69-71.
- Linseed meal**, relative value of as food for brook trout, Titcomb, John W., and others, 133-135.
- Liver**, as food for fish, Einarsen, A. S., and Royal, L., 268-271; (disc.), 165.
meal as trout food, Thompson, W. T., 168-171.
- Louisiana**, fish culture in, Viosca, Percy, Jr., 207-213.

- Meat**, substitute for in diet of trout, Davis, H. S., and Lord, R. F., 160-163.
- Meats**, relative value of for rearing trout, Titcomb, J. W., and others, 135-138.
- Michigan**, food of trout in, Metzelaar, J., 146-152.
trout propagation in, Westerman, F. A., 234-237.
- Midge larvae** as fish food, Johnson, M. S., 153-157.
- Minnesota Experiment Station**, aquatic biology program of, 153.
fish culture in, Surber, T., 224-232.
- Minnows**, bait, parasites of, Bangham, R. V., 198-201.
- Muskellunge**, propagation of, Webster, B. O., 202-203.
- Mussels**, fresh-water, artificial propagation of, Ellis, M. M., 217-222.
- National and state governments**, report of committee on relations with, 33-34.
park standards, resolutions on, 36.
- Ontario**, trout waters of, Harkness, W. J. K., and Ricker, W. E., 256-265.
- Oyster industry**, resolutions for protection of, 36-37.
- Parasites** of bait minnows, Bangham, R. V., 198-201.
- Pickeral** as a fish enemy, 111.
- Pike**, planting of in Minnesota (disc.), Surber, T., 231-233.
- Pittsford, Vt.**, feeding experiments with trout, Davis, H. S., and Lord, R. F., 160-163.
- Plankton animals**, relative abundance of various species of, tabulation of, 99-101.
production, effects of various fertilizers on, Wiebe, A. H., and others, 94-101.
- Planting** of whitefish and lake trout, depth of (disc.), 84-85.
- Pollution**, by algae, 184-185.
Chironomus plumosus as index of (disc.), 158-159.
of lakes and streams, resolution on, 36.
of waters (disc.), 80-84.
- Pond culture** (disc.), 213-215.
- Pond-fish culture** at Fairport Biological Station, investigations in, Davis, H. S., 86-89.
- Ponds**, for fish, utilization of sloughs in the Upper Mississippi Wild Life and Fish Refuge for, Surber, E. W., 106-111.
- President's address**, Culler, C. F., 14.

- Propagation** in inland lakes assisted by staking brush, Webster, B.O., 204-205.
- Protection** and legislation, report of vice-president division of, LeCompte, E. L., 24-28.
- Protection** of black bass (disc.), 29.
- Resolutions:** Bass, black, enforcement of laws for protection of, 36.
Great Lakes fisheries, conservation of and statistics on, 35-36.
Oyster industry, 36-37.
National park standards, 36.
Pollution of lakes and streams, 36.
- Respiratory** movements of fish as indicator of toxic environment, Belding, D. L., 238-243.
- Rotifers**, average number per litre of pond water, tabulation of, 98.
- Salmon**, blue back (sockeye), treaty between United States and Canada for protection of, 32-33.
eggs as trout food, Thompson, W. T., 168-171.
meal as food for fish, Einarsen, A. S., and Royal, L., 268-271.
- Sea fish**, raw wastes of as fish food, Titcomb, John W., and others, 138-142.
- Sewage** disposal plants and increase of fish, Thompson, D. H., 252-253.
- Shrimp** meal as food for fish (disc.), 164.
- Sloughs**, character of (disc.), 111-112.
in Upper Mississippi Wild Life and Fish Refuge, Surber, E. W., 106-111.
- Sockeye salmon** treaty, 32-33.
- Southern States**, fish culture in, Leach, G. C., 215.
- Soy bean**, relative value of as food for brook trout, Titcomb, J. W., and others, 133-135.
- Starch** and growth of brook trout, Titcomb, J. W., and others, 131-145.
- Streams**, pollution of: see **Pollution**.
- Toxic** environment, respiratory movements of fish as indicator of, Belding, D. L., 238-243.
- Trap** for the capture of large-mouth bass fry and fingerlings, Heslen, Herman O., 118-125.
- Treasurer's report**, Avery, Carlos, 16-19.
- Trout**, brook, basic nutritional requirements of, Titcomb, J. W., and others, 126-143.
diet of, substitutes for fresh meat in, Davis, H. S., and Lord, R. F., 160-163.
eggs of, fertilization of (disc.), 60-61.
eggs, taking and care of, Hoofnagle, G. H., 52-54.
food of, in Michigan, Metzelaar, J., 146-152.
food for: see Trout, brook, basic nutritional requirements.
foods consumed by, monthly percentage.
propagation in Michigan, Westerman, F. A., 234-237.
streams, habitability of (disc.), Metzelaar, J., 243-244.

United States Bureau of Fisheries, summary of work of in the Lake Superior region, Cook, W. A., 55-58.

University of Minnesota, address of welcome to, Roberts, T., 15.

Upper Mississippi Wild Life and Fish Refuge, sloughs of as fish ponds, Surber, E. W., 106-111.

Vegetation, disadvantages of in ponds (disc.), 112-113.

PART II. AUTHOR INDEX

- Avery, Carlos:** Secretary-treasurer's report, 16-17.
- Bangham, R. V.:** Parasites of bait minnows, 198-201.
- Belding, David L.:** Respiratory movements of fish as indicator of toxic environment, 238-243.
- Birge, E. A.:** Fish and their food, 188-194.
- Clapp, Alva:** Channel catfish, experiments in rearing, 114-116.
- Cobb, Eben W.:** Food for fish (disc.), 143-144.
- Cobb, Eben W.,** joint author: see **Titcomb, John W.,** and others.
- Cook, W. A.:** Work of the Bureau of Fisheries in the Lake Superior region, 56-59.
- Crowell, Mary F.,** joint author: see **Titcomb, John W.,** and others.
- Culler, C. F.:** President's address, 14.
- Davis, H. S.:** Aquatic biology and physics, report of vice-president division of, 22-23.
Eggs, sizes of (disc.), 59-60.
Pond-fish culture at the Fairport Biological Station, investigations in, 86-89.
shrimp meal as food for fish (disc.), 164.
- Davis, H. S.,** and **R. F. Lord:** Diet of trout, use of substitutes for flesh meat in, 160-163.
- Einarsen, Arthur S.,** and **Royal, Lloyd:** What shall we feed? 268-271.
- Ellis, M. M.:** Mussels, fresh-water, artificial propagation of, 217-222.
- Harkness, William J. K.,** and **Ricker, William E.:** Trout waters of Ontario, preliminary study of, 256-265.
- Hesen, Herman O.:** Trap for the capture of large-mouth bass fry and fingerlings, 118-124.
- Hoofnagle, G. H.:** Lake trout eggs, taking and care of, 53-55.
- Johnson, M. S.:** Chironomid larvae and their usefulness as fish food, 153-157.
Pollution, *Chironomus plumosus* as index of (disc.), 158.

- Laird, James A.:** Fish culture, report of vice-president division of, 21-22.
- Leach, G. C.:** Fish culture in southern states (disc.), 215.
- LeCompte, E. Lee:** Protection and legislation, report of vice-president division of, 24-28.
- Lockwood, Kenneth F.:** Angler and fish culturist, relation between, 246-249.
- Lord, R. F.,** joint author: see **Davis, H. S.**
- McCay, C. M.:** Biological Survey, contributions of to progress in study of fish diseases, 197.
Eggs, sizes of (disc.), 61.
- McCay, C. M.,** joint author: see **Titcomb, John W.,** and others.
- Metzelaar, Jan:** Food of trout in Michigan, 146-152.
Trout streams, habitability of (disc.), 243-244.
- Moore, Emmeline:** Aeration of hatchery water supplies and the incidence of disease, 195-196.
- Nurnberger, Patience Kidd:** Plant and animal associations in a lake, 174-177.
- Oosten, John, Van:** see **Van Oosten, John.**
- Radcliffe, Lewis:** Great Lakes fisheries, status of, 45-51.
- Radcliffe, Rowena,** joint author: see **Wiebe, A. H.**
- Ricker, William E.,** joint author: see **Harkness, William J. K.**
- Roberts, Thomas:** Address of welcome to University of Minnesota, 15.
- Royal, Lloyd,** joint author: see **Einarsen, Arthur S.**
- Surber, Eugene W.:** Sloughs, character of (disc.), 111-112.
Utilization of sloughs in the Upper Mississippi Wild Life and Fish Refuge as fish ponds, 106-111.
Vegetation, disadvantage of in ponds (disc.), 112.
- Surber, T.:** Lake trout eggs, fertilization of, 61.
- Surber, Thaddeus:** Fish culture in Minnesota, 224-231.
Pike, planting of in Minnesota (disc.), 231-233.
- Thompson, David H.:** Champaign County, Illinois, survey of fishes of 250-255.
- Thompson, W. T.:** Salmon eggs and horse flesh as trout food, 168-171.
- Tilden, Josephine E.:** Algal food of fishes, plant material and debris, 178-187.

- Titcomb, John W.:** Librarian's report, 19-20.
- Titcomb, John W., Cobb, E. W., Crowell, M. F., and McCay, C. M.:**
Brook trout, basic nutritional requirements of and relative value of
plant and animal by-products as food for, 126-143.
- Tucker, W.:** Fish culture in southern states (disc.), 215-216.
- Van Oosten, John:** Fisheries problems on the Great Lakes, 63-78.
Pollution of waters (disc.), 80.
- Viosca, Percy, Jr.,** Fish culture in Louisiana, 207-213.
- Ward, Fern,** joint author: see **Wiebe, A. H.**
- Webster, B. O.:** Brush to assist natural propagation in inland lakes,
204-205.
Eggs, sizes of (disc.), 60.
Propagation of muskellunge, 202-203.
- Westerman, F. A.:** Trout propagation in Michigan, progress of, 234-237.
- Wicks, J.:** Pollution of waters (disc.), 80.
- Wiebe, A. H.:** Fertilization of fish ponds (disc.), 101-103, 104.
Growth, factors in (disc.), 144-145.
- Wiebe, A. H.,** assisted by Radcliffe, R., and Ward, F.: Plankton produc-
tion, the effects of various fertilizers on, 94-101.
